

PACIFIC ILLUMINATION

## **New enhancements to the way you light your games!**

CasinoTech is proud to offer you 2 brand new solutions to your game lighting applications. Both of these products have been developed by Pacific Illumination, and provide you with the same quality and reliability that you've come to expect.

### **Bench-Top CCFL Test Unit**

**Improve the way you test the CCFLs on every game on your floor!**

#### **Features:**

- **Ease of use**—simply plug in a CCFL and turn on the unit to test the lamp
- **110 Volt powered unit**—comes with a pre-connected AC cord with plug and in-line ON/OFF switch
- **Eliminate guess work**— provides quick starting point when trying to find out why the LCD in your monitor is not lighting up or is dim or pink in color.
- **Versatile**—Can power any size lamp from 1 inch to 36 inches
- **Safe and reliable**—Built in voltage surge protection

### **LED Embedded Edge Lit Panel for Konami Belly glass**

**Upgrade your Konami belly glass CCFLs to durable LEDs!**

**This durable LED panel is the result of research into the problems many techs experience in dealing with the lamps currently installed on their Konami machines.**

- **Powered by 12 volt power source. Simply plug power cord into existing Molex connector**
- **No need for ballasts, inverters, or adaptors**
- **Drop crew closing the belly glass door too hard, breaking the lamps inside? This LED is durable enough to stand up to repeated, rough handling.**
- **Completely eliminated the cold cathode inverter, providing a faster and easier replacement to the lamps currently installed**

**Both the Bench Top Test Unit and the new Konami Belly Glass LED offer features that can assist you in your day to day maintenance of your machines. At CasinoTech, we strive to bring you new products and innovations to keep your games operating at their peak.**
